GOOD ENERGY LAUNCHES GOOD DEEDS

In order to actively participate in the life of the local communities within which we operate, and in order to develop a successful and mutually beneficial cooperation with the cities of Novi Sad and Niš, the company "LUKOIL SRBIJA" AD is organizing a project in the field of corporate social responsibility called "Good Energy Launches Good Deeds", at its gas stations from May 25 until June 25.

In cooperation with City Administrations and the Union of Youth Organizations OPENS 2019, the Company has chosen two institutions to help on the territory of each of these two cities. In Novi Sad, the Company will donate money to Svratište *(in English: Hangout)* for street kids and to the Home for Developmentally Challenged Children and Youth in Veternik. In Niš, the recipients will be the Center for Family Housing and Adoption and the Institution for Day-Long Care of Developmentally Challenged Children and Youth "Mara".

Citizens of Novi Sad and Niš will actively participate in these activities by giving their vote and deciding how the fund, worth over 500,000 RSD, will be distributed among the two institutions. The institution which receives more votes will receive equipment or other supplies of their choice in the amount of 300,000 RSD, while the runner-up will receive the amount of 200,000 RSD.

With every purchase at ten gas stations in Novi Sad and Niš, consumers will gain the right to vote for one of the two institutions and make a personal contribution to the institution they have chosen to receive required equipment.
