SOCIALIZING WITH CHILDREN AND A DONATION TO THE ANTON SKALA SCHOOL

The President of the Municipality of Savski venac Irena Vujović, the Selector of the Serbian woman's basketball team Marina Maljković and representatives of the company LUKOIL SRBIJA, visited the elementary school for children with special needs Anton Skala in order to make a donation to the school and socialize with the children.

Irena Vujović pointed out that the Municipality's objective was for all elementary school children from Savski venac to have the best conditions for learning and proper development as possible. “We gave the Anton Skala school an inversion trainer that was needed for physical education,” Irena Vujović said thanking Marina Maljković for spending time with students from the Anton Skala school and socially responsible company LUKOIL SRBIJA, which donated funds for the purchase of Montessori materials. She added that cooperation with a company, that is always ready to support actions like this one, will continue.

Marina Maljković held a demonstrative exercise and handed out presents in the form of sports equipment, which the kids enjoyed the most. “We want to motivate children to devote themselves to a healthy lifestyle and sports. Using sports vocabulary, this is a big joint victory for all of us who joined this action,” the Selector said.

Nastas Mihajlović, Director of supply and wholesale, expressed satisfaction that the company contributed to the improvement of the Anton Skala school, adding that the company has been supporting similar activities for many years.

The school Principal Nataša Selić Stankovic stressed how thankful they were for the “friendship class”, giving Irena Vujović, Nastas Mihajlović and Marina Maljković acknowledgments from the school.
