LUKOIL SRBIJA DONATED THE OUTDOOR CLASSROM TO THE PRIMARY SCHOOL IN ŽITKOVAC

The grand opening of the recently completed outdoor classroom, with the support of the donation by company "LUKOIL SRBIJA", which, through its usual activities, provides support to the local communities and institutions, was held at Primary School "Vuk Karadžić", in Žitkovac.

In the presence of the school staff, representatives of the local self-government led by Aleksinac Municipality President, Dalibor Radičević, the grand opening of the outdoor classroom was announced by the school Principal, Milan Dinić.

The classroom satisfies all needs of this school and, according to the Principal, during the classroom construction, the size of the classroom was taken into account, in order for it to accommodate 25 students. As it is the case with all classrooms in the school, this outdoor classroom will meet all necessary technological conditions and will allow children to spend as much time as possible in the open area, to have a healthy growth. The activity plan in this classroom will depend on the school program. It may also be used in the rainy periods because it is covered and protected well, stressed out Principal Dinić. In the year when LUKOIL celebrates the 30 years jubilee the highest portion of the funds intended for corporate social responsibility and humanitarian projects is directed by LUKOIL SRBIJA to the support of children's institutions, schools, kindergartens, and care homes for children with special needs.
