LUKOIL DONATED EQUIPMENT FOR CHILDREN'S PLAYGROUND TO SUNCOKRETI KINDERGARTEN

As part of the celebration of the jubilee year of the company PAO "LUKOIL" in Vladimirci, another in a series of LUKOIL SRBIJA socially responsible projects was realized. Kindergarten "Suncokreti" received a kids' house and play equipment as a gift.

In the presence of the Chairman of the Municipality Goran Zarić, the Director of the Institution Zorica Milošević and the "Suncokreti" staff, as well as the representative of our Company, the honor to cut the ribbon on behalf of all kindergarten children was given to six-year-old preschooler Arsen Šimonović. Eager to start the game, the children embellished this event with their smiles and cheerful shouts. "Of course, the children immediately tried the new playground with joy. The LUKOIL donation is a great thing for us and our children because this new playground will help them develop healthily and properly. Healthy lifestyle and care for nature are topics to which we dedicate a lot of time and attention, since "Suncokreti" is an eco-kindergarten with a special plantation of indigenous varieties of fruits that are not sprayed and with a cultivation of medicinal plants. All our children are actively involved in the maintenance of plants," Zorica Milošević pointed out.

The Institution for Preschool Upbringing and Education of Children "Suncokreti" has been working for 42 years and has five purpose-built facilities: kindergartens in Vladimirci, Debrc, Provo and Jalovik and a nursery in Vladimirci.
