TACTICAL-DEMONSTRATION EXERCISE OF THE FIRE FIGHTING UNIT AT THE LUKOIL SRBIJA WAREHOUSE

A tactical-demonstration exercise performed by the firefighting unit at the LUKOIL SRBIJA petroleum products warehouse in Ostružnica was held according to an adopted report on firefighting exercise. The goal of this exercise was to demonstrate the operation and check the readiness of the Ostružnica firefighting unit to localize a fire until the arrival of a professional fire department of the Ministry of Internal Affairs. The unit demostrated the ability to independently limit an emergency situation in the event of depressurization of a tank and leakage of petroleum products into a tank, which results in the ignition of spilled petroleum products.

The exercise was preceded by specialized theoretical and practical training during the summer months in the field of preventive and proactive actions of the fire unit.

Through the exercise, the SND Ostružnica firefighting unit successfully demonstrated that it not only knows how to perform prevention, but can also successfully deal with an accident.
