REGULAR FIRE-FIGHTING DRILL AT THE OSTRUŽNICA FUEL WAREHOUSE

In accordance with the LUKOIL SRBIJA annual plan of regular training and exercises, a regular wet fire-fighting drill with simulated fire was held at the fuel warehouse (SND) "Ostružnica". A tactical demonstration fire-fighting drill was carried out by nine members of the SND "Ostružnica" fire-fighting unit and two members of the FTO SND "Ostružnica" according to the fire-fighting drill report. The aim of the exercise was to check and practice the readiness of the members of the fire department to respond in the event of a fire with the available means and equipment until the arrival of the professional fire department of the Ministry of Internal Affairs.

During the exercise of extinguishing a fire caused by a simulated malfunction in the electrical installation, a response plan was implemented. The exercise was led by the head of the SND "Ostružnica" fire unit. The exercise was successfully conducted with the highest marks and the members of the fire unit demonstrated a high level of readiness to respond.
