FEST WITH THE SUPPORT OF LUKOIL SRBIJA

The recently signed cooperation agreement with the City of Belgrade for 2018 is a continuation of cooperation between the City of Belgrade and "LUKOIL" during the implementation and financing of projects in the field of sports, culture, science and social protection. FEST, one of the most important film festivals in the region, has found a place among these projects again this year.

From 1971 until the present, FEST has been visited by around four million viewers and has featured nearly 4,000 significant world films – FEST being a chance for these films to have their Yugoslavian, Serbian and regional premier. The 46th FEST, under the title "Priđi bliže" (Come Closer), continues its important cultural and educational task with the same energy, expanding the film horizons for all film art lovers.

The Director of the Center of Belgrade Festivals CEBEF, the organizer of a large number of cultural events in the city, thanked the City of Belgrade and "LUKOIL" for their support and an awareness that it is important to invest in culture. "We are especially grateful to LUKOIL, who recognized FEST as one of the important cultural events of the city," said Nataša Ilić, adding that this represents encouragement to cultural institutions letting them known that someone is thinking about, and investing, in their programs.

During FEST, held from February 23 until March 4 at the Sava Center in Belgrade, the Company presented visitors with the loyalty program and the benefits of being a part of our retail network.
