LUKOIL CONTINUES THE PROGRAM OF SUPPORT TO PRIMARY SCHOOLS

Through the implementation of its socially responsible program LUKOIL SERBIA responded to the request of the Elementary School "Dragoljub Ilić" from Dračić near Valjevo and allocated funds for the purchase of an Interactive 75" LED display for the purposes of enriching the teaching process in the Russian language classroom. Thanks to the donation, the current and the new generations will be able to get acquainted with the beauty of the language and culture in a technologically modern way and develop into erudite and broad-minded young people.

The principal Nenad Ranisavljević thanked for the donation on behalf of the school. He emphasized that with this donation, LUKOIL SERBIA supported a program aimed at developing creative potential through interactive teaching.
