LUKOIL DONATED LOCKERS FOR FIRST-GRADE PUPILS IN THE “ŽARKO ZRENJANIN” PRIMARY SCHOOL

LUKOIL SERBIA has allocated funds for the production and installation of six cassette cabinets with 12 cassettes each, which are placed in the first-grade classrooms of the "Žarko Zrenjanin" Primary School from Banatsko Novo Selo. According to the school director Marinel Blaž, this donation covers all first-grade pupils of the only primary school in this large village, who can now leave their books and school supplies and lighten their school bags. The goal of this LUKOIL donation is to improve conditions in institutions focused on working with children, in smaller towns or villages, too. In the process of selecting socially responsible projects such as this one, partners who manage gas stations and have direct insight into the needs of local communities play an important role.
