CONTINUED SUPPORT TO PRESCHOOL INSTITUTIONS

The program of socially responsible projects implemented by LUKOIL SERBIA has continued in Bajina Bašta with a donation to the preschool institution "Neven". 60 new children's beds were purchased, which enabled the complete replacement of worn-out beds in two study rooms, thus providing the little ones with better and more comfortable conditions for their daily rest.

The director of the kindergarten, Rada Lazić, said that the donation was realized in record time - in less than a month and that the new beds are already in use. She pointed out that thanks to this support from LUKOIL, the institution was able to improve the conditions for the children's stay and additionally provide better care and rest for them.

This donation is part of the broader goal of supporting the community in which the LUKOIL company operates, and it is planned to continue the realization of socially responsible activities.
